Import Data using Transform Maps

Phase 4 – Project Planning

Planned Development Steps

1. Understand the project requirements.
2. Prepare the source data.
3. Create/import the Import Set.
4. Create the Transform Map.
5. Configure field mappings.
6. Run the transformation.
7. Verify the target records.
8. Test the imported data.
9. Document the project.
10. Prepare the demonstration.

Project Outcome

Successful import and transformation of source data into the ServiceNow target table.

Project Deliverables

Project configuration/update-set XML, project documentation, testing evidence, GitHub repository, and project demonstration video.
